The exemption applies whether the qualified property is purchased, leased or rented. Also exempt are repair parts, materials, and labor services for the qualified property. CONSTRUCTION OR REMODELING PROJECTS. A railroad is NOT exempt from sales tax on the purchase of materials or labor services for a construction project unless the project itself qualifies for a project exemption as an economic development project. When laying new track, the materials (track, ties, etc.) and labor are subject to state and local sales tax. When a railroad contracts with a contractor to build a new building or facility, all materials for the project (whether purchased by the general contractor, subcontractor, or the railroad) are taxable. Labor services on original construction of a building or facility are exempt by law. When a railroad contracts to have a building or facility remodeled, the labor services, as well as the materials, are taxable. *This exemption certificate cannot be used by a railroad to purchase materials or labor services for any type of construction project.*

RETAINING THIS CERTIFICATE. Sellers should retain a completed copy of this certificate in their records for at least three years from the date of sale. A seller is relieved of liability for the tax if it obtains a completed exemption certificate from a purchaser with which the seller has a recurring business relationship. A certificate need not be renewed or updated when there is a recurring business relationship between the buyer and seller. A recurring business relationship exists when a period of no more than 12 months elapses between sales transactions.
